Microblading aftercare instructions

Caring for your brows

These are your studio's care steps. If your artist told you something different, follow your artist.

- Keep the area clean and dry for the first days. Your artist tells you how many.
- Don't pick, rub or scratch. Flaking is part of healing.
- Skip makeup on the area, saunas, swimming and hard workouts until your artist says it has healed.
- Keep the area out of the sun and tanning beds while it heals.
- Use only the aftercare product your artist gave you, in the amount they showed you.
- Sleep on your back for the first nights if you can, so your brows don't rub on the pillow.
- Healed color is softer than on the first day. Your perfecting session, 6 to 8 weeks after this visit, is where it gets refined.

If something looks or feels wrong, contact the studio. For a medical concern, contact your doctor.
