What you agree to

Permanence

Permanent eyeliner is a cosmetic tattoo. It fades over time but doesn't fully go away. Removing it takes several sessions and may leave a mark.

Initials

Healed results

Healed results vary from person to person. My skin type, oily skin, the sun, my skincare and how I follow the care steps change how the color heals and how long it lasts. Healed color is usually softer than on the first day.

Initials

Shape and color

I looked at the shape and color for my eyeliner and approved them before the artist started. Faces aren't perfectly even, so small differences between sides are natural.

Initials

Perfecting session

Most clients need a perfecting session to finish the shape and color. The studio sets when it happens and its price.

Initials

Risks

Any tattoo carries some risk of infection, allergic reaction, swelling or bruising. Following the care steps lowers the risk. I'll contact the studio about anything unusual, and my doctor about a medical concern.

Initials

About the pigments

The FDA treats tattoo and permanent makeup pigments as cosmetics and hasn't approved any color additive for injection into the skin.

Initials

MRI scans

The FDA lists MRI complications among the possible risks of tattoos and permanent makeup. I'll tell the MRI staff about my permanent makeup before a scan.

Initials

My answers

I answered the health questions truthfully. I'll tell my artist before the appointment if anything changes.

Initials

Alcohol and drugs

I'm not under the influence of alcohol or drugs.

Initials

Swelling

Swelling and redness around the eyes are common for a day or two after. I'll keep contact lenses out and skip eye makeup for as long as my artist asks.

Initials

Eye safety

I'll keep my eyes closed and still when asked. The artist may stop if it isn't safe to go on.

Deposit policy

Your deposit holds your appointment and comes off your final price. Moving your appointment needs at least 48 hours' notice. A missed appointment without notice keeps the deposit.
